Documents

1W in Standby mode

The unit consumes less than 1W in standby mode

Anion Filter

This filter releases negative ions that refresh the air and provide a clean, refreshing atmosphere.

Sleep Mode

This mode saves energy and improves night time comfort. The set temperature will increase by 1°C per hour in cooling mode or decrease by 1°C per hour in heating mode, for the first 2 hours of operation. Thereafter the unit will retain the new temperature for 5 hours after which it will switch off automatically!

Base Pan Heater

Offers anti-freeze protection even in temperatures as low as -15oC

ECO Mode

By activating this mode, the unit can consume up to 60% less energy, comparing to the normal mode. The unit automatically adjusts the fan speed and the compressor's rotation providing you the same level of comfort but with the minimum energy consumption.

Auto Defrosting

Prevents evaporator from freezing and maintains dehumidifying effect under low temperature ambient.

Wind Avoid Me

Choose this mode to redirect the air away from the users

Vitamin C

Vitamin C, with its antioxidant action, is beneficial for skin health, due to its important role in the synthesis of skin collagen. This filter releases Vitamin C in the space, enhancing the elasticity and hydration of the occupants' skin during the operation of the air conditioner.

Cold Catalyst Filter

Eliminates formaldehyde and other volatile organic compounds (VOCs) as well as harmful gases and odors. The filter's effectiveness does not deteriorate over time.

Smart warm-up

During the winter, the unit starts with a high air outlet temperature. This way no cold air currents are generated until the unit enters heating mode.

Carrier Warranty

Carrier invented modern air-conditioning in 1902. Since then we are continuously innovating our products to provide you excellent efficiency and energy savings.

Timer

Allows you to start the unit at a preset time in the desired cooling or heating mode.

Active Clean Technology

Washes away dust, mold, and grease that may cause odors when attached to the heat exchanger.

Follow Me Mode

A temperature sensor built in the remote controller will sense its surrounding temperature. The unit can adjust room temperature more accurately to the area you place the remote controller, to give you greater comfort.

Silent Mode

Indoor fan will run at super quiet mode, achieving extremely low noise levels.

Eurovent certified

Eurovent's certification ensures that all technical characteristics labeled on a product by its' manufacturer are true.

Electrical voltage protection (168 to 264V)

The can fully operate within the power range of 168 to 230V, while also being protected from any fluctuations that may occur within this range.

Automatic Restart

After a potential power failure, the unit will automatically restart, keeping all previous settings.

Self Diagnosis & Auto Protection

Once abnormal operation or part failure happens, the unit will shut off automatically to protect the system. Meanwhile it will indicate protection or error code for fast service.

New i-Remote controller

Our new elegant controller i-Remote, offers a big bright screen which helps you monitor the function parameters. With only one-button-push you can now enjoy multiple functions instantly.

Pre-Filter

The pre-filter withholds the largest dust particles suspending in the air, removing them from the air flow before they enter the air-conditioning unit. It covers the air intake and thus helps keeping the unit and the coil clean from dirt and debris, providing better air quality. The pre-filter can be removed and cleaned with soap-water without losing its effectiveness.

Gold Fin

Unique anti-corrosive golden coating on the heat exchangers can withstand the salty air, rain and other corrosive elements. It also effectively prevents bacteria from breeding and improves heat efficiency.

Remote Control Locking

You can lock the remote control to make sure that the selected settings are not accidentally changed.

Wi-Fi Activated

You can remotely control one or more Carrier air conditioners and dehumidifiers with a user-friendly mobile app (available for iOS & Android). The Wi-Fi stick is placed within the product packaging and no additional equipment is required to connect the device.

Chiller leakage detection system

In case of cooling fluid leakage, the unit automatically detects the leak and shuts operation down while at the same it alerts you with the corresponding malfunction code on the indoor unit screen.

Ionizer

Releases negative ions to the air, simulating the relaxing effects of forests and waterfalls.

Turbo Mode

Turbo function will be helpful to cool or heat your room quickly and effectively.
